

MEMORANDUM FOR THE RECORD

SUBJECT: Commercial Bus Study

I met with Mr. Leonard Arronson and Mr. John Williams, Department of Defense, and Mr. Barney Flynt from the Department of State concerning a use agreement for the mutual use of each others shuttle service in the triangle. We all agreed that such a reciprocal agreement would be mutually beneficial and in light of todays constraints on the budget and the concern for power conservation, we all felt that this is something that should be done. It was also agreed that the agreement should be as informal and simple as possible, but the Department of Defense insists that they have the approval of their legal counsel. They anticipate no difficulty in securing since we are speaking of reciprocal service. This agreement will be prepared by them and submitted for our review and approval. It was further agreed that we would recognize each others badges to gain access to the buses. The finesse of scheduling and stops will be worked out after the agreement is officially approved.
